Time since pasteurisation/h
(e)
Carton A
below the limit
≈2,500 CFU mL−1
Carton B
close to the limit
≈20,000 CFU mL−1
Carton C
spoiled at 50 h
The monitor predicts 67 h for all three.
It is late for C and early for A and B.
The error is biological: a more accurate
sensor cannot remove it.
